

PRODUCT INFORMATION

P.C. VALVE CLEANER, 250 ml

Art. No. 60022

PROFI-CAR VALVE-CLEANER is used in case of poor compression, ringing and after-running of the engine. As a safeguard for any carburetor repair.

Properties

- removes deposits from valves, valve seats
- cleans valve seats in case of poor compression, engine performance and for fault checking
- removes residues in the carburetor on valves, spark plugs and in combustion chambers
- keeps the engine clean improves the CO level
- improves compression, thus reducing fuel consumption
- Protects the engine and tank from corrosion even during long periods of inactivity

Areas of application

For deposits on the valves and in the intake and combustion system. Causes optimal energy utilization.

Application

Indirect cleaning:

Add one can to the half-full tank.

Direct cleaning:

Remove the air filter and let it suck directly into the carburetor (via the vacuum hose in the case of fuel injectors) while the engine is at operating temperature. Change engine speed, drive approx. 5-6 km with full load on the engine. Check valve clearance afterwards. For 6-cylinder engines and above, double the process.

The expiration date is 3 years after production date under the permission that the product is stored in a dark, dry and cool place.

Our data sheets and prints should advise in all conscience. The content is regarding to treatment and application an unenforceable obligation as we have no bearing on it. Modifications which result in improvement are reserved.
